Stowaway SupaLite 4

Welcome to the lightest four-wheeled mobility scooter in the world, the Stowaway SupaLite 4. This attention-grabbing addition to the Stowaway range features pneumatic rear tyres, along with a unique flat-folding seat that saves space effectively. Moreover, you will observe that the front wheels are positioned close together, providing the stability of four wheels combined with the manoeuvrability of three. The Stowaway SupaLite 4 boasts an astonishing weight of 21.1 kg (46.5 lbs) and can be disassembled into two sections, with the heaviest part weighing just 14.3 kg. This feature proves convenient for home storage or when lifting it into your car. And did we mention the new lightweight Panasonic lithium battery? On a full charge, you can travel up to 8 miles (12.9 km), and the speed reduction system aids in slowing down the scooter when making turns. This portable scooter is user-friendly, whether you are an experienced or novice mobility scooter user. The speed reduction system serves as a valuable safety feature, automatically decelerating the scooter during cornering.
