Eazi Chair Ultra

The Eazi Chair Ultra is one of the newest additions to the Mobility at Sea range of powerchairs. It is equipped with a large frame, wheels, and longer footrest for extra room. Using a lightweight aluminium alloy frame helps to keep the weight of the chair to a minimum. A total travel distance of 15.5 miles is made possible by the 2 lithium batteries which slide discreetly into the side of the frame. The two powerful 250W motors and large rear wheels really help when driving across rough terrain. You'll find that it's perfect to use in your home, around the local area, or for longer and more challenging days out. It can be folded in under 10 seconds, so if you're the kind of person that's always on the go, the eazi chair is a real time saver. Once folded, it can either be stored flat in the boot of your car or vertically in a small cupboard. The Eazi Chair Ultra strikes the perfect balance between manoeuvrability, comfort, and performance. It's quite simply a complete powerchair that can be used in your home, the town centre or park, and on all forms of public transport.

Specifications
