

Mobility at Sea

Mobility Scooters

Reference no. ST008

Stowaway Sapphire

The Stowaway Sapphire is portable but needs to be dismantled into 5 pieces. The range and speed of the scooter may vary depending on the weight of the user, terrain type, outside temperature and battery charge. We advise that you plan your route to avoid adverse terrain and inclines if possible; if this is unavoidable, we do not advise an incline above 5°.

Due to the size of this scooter, the manoeuvrability around ships may be reduced.
